SUMMARY

Computer Engineering graduate with hands-on experience in **software development, web applications, and database-driven applications**. Proficient in **JavaScript, Python, and SQL** with strong problem-solving and debugging skills. Experienced in building responsive applications, API-driven systems, and collaborative projects. Eager to learn new technologies and contribute to high-quality software solutions.

TECHNICAL SKILLS

Programming: C++, C#, Python, JavaScript, TypeScript Fundamentals

Web Development & Frameworks: HTML, CSS, ReactJS Fundamentals, Next.js Fundamentals, Express.js Fundamentals, REST API

Software Engineering: Object-Oriented Programming (OOP), Data Structures, Algorithms, Software Development Lifecycle

Tools & Platforms: VS Code, Git, GitHub, Vercel (Basic), Node.js, npm

Databases: Supabase (PostgreSQL), MS SQL Server, NoSQL

Testing & QA: Unit Testing Concepts (Jest and Jasmine), Debugging, Issue Troubleshooting

Hardware & Systems: Logic Design, Microcontrollers, Circuit Prototyping

PROJECTS

Voltix: Tech Gadget Store — *Personal Project (March 2026 – Present)*

Next.js · Supabase · PostgreSQL · Tailwind CSS · shadcn/ui · TypeScript

- Integrated **Supabase Auth** to support **Social OAuth (Google)** and secure email/password flows, ensuring a streamlined user onboarding experience.
- Developed custom **PostgreSQL functions** and strict **Row Level Security (RLS)** policies to manage user permissions and protect sensitive administrative data.
- Developed CRUD functionality using the **Supabase Client**, performing direct read/update/insert/delete queries to handle application state.
- Leveraged **Supabase UI blocks, shadcn/ui** and **Tailwind CSS** to rapidly build a responsive, accessible interface for authentication and data entry.
- Utilized a Backend-as-a-Service (BaaS) approach to centralize auth and database management, significantly reducing development overhead.

Classic Sudoku Web App — *Personal Project (Oct 2025)*

React · JavaScript · Tailwind CSS · Vite · REST API

- Developed an interactive 9×9 Sudoku game with real-time validation and mistake tracking.
- Implemented pencil mode and full keyboard navigation for improved user experience.
- Designed responsive, mobile-first UI with light/dark theme support.
- Integrated external API to dynamically fetch Sudoku puzzles and grid data.
- Managed application state using React Hooks.

HydroGuard: Flood Management Suite — *Capstone Project (Aug 2023 – May 2024)*

HTML · CSS · JavaScript · Express.js · Arduino · XBee Wireless Module · Sensor Array

- Built responsive page template using EJS view engine
- Focused on interface design and usability, while collaborating with the backend developer.
- Interfaced sensors with Arduino Uno and ensured data was accurately transmitted and received.

- Integrated sensors to monitor temperature, humidity, and water levels.

Attendance Monitoring System using RFID — Academic Project (Jan 2023 – May 2023)

C# · C++ · .NET Framework · MS SQL · Arduino

- Designed and implemented a **desktop application** with an RFID-based attendance logging feature.
- Integrated database management and user dashboards for tracking attendance records.

PRACTICAL EXPERIENCE

Scan Marine, Inc. — On-the-Job Training

June 2024 – August 2024

- Assisted in configuring embedded systems, device communication, and troubleshooting
- Helped **configure network devices** (NVRs, transceivers, and servers) ensuring optimal communication and data storage.
- Worked collaboratively with engineers to troubleshoot, document, and implement system improvements.

EDUCATION

Bachelor of Science in Computer Engineering

University of Saint Louis Tuguegarao - June 2025

Relevant Coursework:

Software Design · Embedded Systems · Object-Oriented Programming · Data Structures & Algorithms · Microprocessor & Microcontroller Systems · Computer Architecture & Organization

CERTIFICATIONS & AWARDS

Professional Certifications

- Civil Service Exam – Professional Level (2024)
- TESDA Computer Systems Servicing NC II (2021)
- Python Programming Fundamentals — Coddy.tech (2026)
- JavaScript Programming Fundamentals — Coddy.tech (2025)

ICpEP CPE Challenge

- **Champion** – Logic Circuit Design, Regional (2025)
- **Finalist** – Logic Circuit Design, National (2025)
- **1st Runner Up** – Quiz Bowl, Regional (2023)

Other Recognitions

- **Gawad San Luis 2025** – University of Saint Luis Tuguegarao
- **Finalist** – DOST ISU Smart City IdeaTech Challenge (2023)
- **Participant** – CERT-PH Cyber Challenge (DICT R2 Hack4Gov 2023)

CORE COMPETENCIES

Analytical Thinking · Problem Solving · Team Collaboration · Adaptability · Time Management · Communication Skills
