SUMMARY

Computer Engineering graduate with hands-on experience in **software development, web applications, and system integration**. Proficient in **JavaScript, Python, C++**, and **SQL** with strong problem-solving and debugging skills. Experienced in building responsive applications, API-driven systems, and collaborative projects. Eager to learn new technologies and contribute to high-quality software solutions.

EDUCATION

Bachelor of Science in Computer Engineering

University of Saint Louis Tuguegarao June 2025

Relevant Coursework:

Software Design · Embedded Systems · Object-Oriented Programming · Data Structures & Algorithms · Microprocessor & Microcontroller Systems · Computer Architecture & Organization

WORK EXPERIENCE

Scan Marine, Inc. — *On-the-Job Training*

June 2024 – August 2024

- Assisted in configuring embedded systems, device communication, and troubleshooting
- Helped **configure network devices** (NVRs, transceivers, and servers) ensuring optimal communication and data storage.
- Worked collaboratively with engineers to troubleshoot, document, and implement system improvements.

PROJECTS

Classic Sudoku Web App — *Personal Project (Oct 2025)*

React · JavaScript · Tailwind CSS · Vite · REST API

- Developed an interactive 9×9 Sudoku game with real-time validation and mistake tracking.
- Implemented pencil mode and full keyboard navigation for improved user experience.
- Designed responsive, mobile-first UI with light/dark theme support.
- Integrated external API to dynamically fetch Sudoku puzzles and grid data.
- Managed application state using React Hooks.

HydroGuard: Flood Management Suite — *Capstone Project (Aug 2023 – May 2024)*

Front-end: HTML · CSS · JavaScript · Express.js (EJS Templates)

- Built responsive page template using EJS view engine
- Focused on interface design and usability, while collaborating with the backend developer.

Hardware: Arduino · XBee Wireless Module · Sensor Array

- Interfaced sensors with Arduino Uno and ensured data was accurately transmitted and received.
- Integrated sensors to monitor temperature, humidity, and water levels.

Attendance Monitoring System using RFID — Academic Project (Jan 2023 – May 2023)

C# · C++ · .NET Framework · MS SQL · Arduino

- Designed and implemented a **desktop application** with an RFID-based attendance logging feature.
- Integrated database management and user dashboards for tracking attendance records.

ORGANIZATION

Institute of Computer Engineers of the Philippines – Student Edition (ICpEP.SE)

Year Level Representative (A.Y. 2024–2025)

- Coordinated student participation in academic and organizational events.
- Supported communication and logistics for technical competitions and activities.

CERTIFICATIONS & AWARDS

Professional Certifications

- Civil Service Exam – Professional Level (2024)
- TESDA Computer Systems Servicing NC II (2021)

ICpEP CPE Challenge

- **Champion** – Logic Circuit Design, Regional (2025)
- **Finalist** – Logic Circuit Design, National (2025)
- **1st Runner Up** – Quiz Bowl, Regional (2023)

Other Recognitions

- **Gawad San Luis 2025** – University of Saint Luis Tuguegarao
- **Finalist** – DOST ISU Smart City IdeaTech Challenge (2023)
- **Participant** – CERT-PH Cyber Challenge (DICT Hack4Gov 2023)

TECHNICAL SKILLS

Programming: C++, C#, Python, JavaScript, TypeScript Fundamentals, OOP

Web Development: HTML, CSS, ReactJS Fundamentals, Express.js Fundamentals

Tools & Platforms: Arduino, Raspberry Pi, Visual Studio Code, MATLAB, Quartus

Hardware & Systems: Logic Design, Microcontrollers, Circuit Prototyping

PROFESSIONAL SKILLS

Analytical Thinking · Problem Solving · Team Collaboration · Adaptability

Time Management · Communication
